

U.S. General Services Administration

Future Commercial Satellite Communications Services Acquisition (FCSA)

An Integrated Technology Solution for Your Satellite Needs

Introduction to FCSA

If your agency requires commercial satellite solutions, look to the Future Commercial Satellite Communications (FCSA) program. In July 2009, the Defense Information Systems Agency (DISA) and General Services Administration (GSA) became partners in the development and execution of a new program to replace the following contracts expiring in 2011-2012:

- DISA Defense Information Systems Network Satellite Transmission Services – Global (DSTS-G)
- GSA SATCOM II contracts
- DOD Immarsat contracts

GSA & DISA Partnership

The collaboration of GSA and DISA for FCSA:

- Creates a common marketplace for all government customers
- Allows ongoing opportunities to add new competitors and technologies
- Ensures solutions that meet government information assurance and protection requirements
- Reduces acquisition cost to replace existing contracts, saving taxpayers millions of dollars

Service Areas

Transponded Capacity: Dedicated satellite bandwidth and power in any commercially available frequency band, Available in FY11 through new Schedule 70 Special Item Number (SIN) 132-54

Subscription Services: Preexisting, pre-engineered Fixed Satellite Service (FSS) or Mobile Satellite Service (MSS) solutions, including terminals tied to a service, in any commercial frequency band. Available in FY11 through new Schedule 70 Special Item Number (SIN) 132-55

End-to-End Solutions: Customer-defined customized solutions consisting of satellite service, equipment and engineering support. Available in FY 11 through the new Custom SATCOM Solutions (CS2) and CS2-Small Business contracts

Smarter Solutions

Availability

Transponded Capacity: Available in FY11 through new Schedule 70 Special Item Number (SIN) 132-54

Subscription Services: Available in FY11 through new Schedule 70 Special Item Number (SIN) 132-55

End-to-End Solutions: Available in FY 11 through the new Custom SATCOM Solutions (CS2) and CS2 Small Business contracts

Ordering Flexibility

When you choose to use COMSATCOM contracts, you may take the advantage of direct ordering and billing, or opt for GSA-assisted ordering and billing. The GSA e-Buy system is an easy way to receive quotes from FCSA contractors. For further information concerning e-Buy, please visit www.gsa.gov/ebuy.

***DoD customers are required to follow DoD/DISA ordering procedures.**

FCSA Timeline

- **Schedule 70 RFPs** – February 2010
- **Schedule 70 awards and initial task order competitions-** NLT second quarter FY 2011
- **Draft ID/IQ RFPs published for comment-** March 2010
- **ID/IQ awards-**fourth quarter FY 2011
