

WAN Optimization

www.harriscaprock.com/WAN

Harris CapRock's fully managed WAN Optimization service, powered by Riverbed Technology®, improves the performance of enterprise applications over satellite-based wide area networks (WANs). Designed as a turnkey, scalable solution, Harris CapRock's WAN Optimization service maximizes available bandwidth for remote operations around the globe.

Accelerates applications

Improves application performance generally 5 to 50 times – and even up to 100 times

Optimizes bandwidth utilization

Allows corporate applications to fully utilize available bandwidth

Simplifies backup and replication

Eliminates the need for remote server infrastructure and often reduces backup times from hours to minutes

IMPROVES THE THROUGHPUT OF COMMON APPLICATIONS:

File sharing 20-25x*	Document management 10-20x*
E-mail 15-25x*	ERP and CRM 5-15x*
Databases 2-4x*	Internet 5-10x*

**most likely performance range*

BENEFITS

- > Improves real-time collaboration between remote site and corporate office
- > Reduces the need to increase bandwidth, storage or servers
- > Maximizes security and protection of corporate data
- > Increases access to corporate resources such as training and e-learning

Solution Overview

Support provided 24/7 by Harris CapRock's Customer Support Center (CSC)

Seamless integration into existing network infrastructure

Scales to support number of users, location and application requirements

Appliance deployed at both remote site and corporate office

Bandwidth management provided via application prioritization

- > Network installation is custom designed by Harris CapRock engineering
- > Equipment operated, monitored and managed by Harris CapRock
- > Supported on both TDMA and SCPC networks
