Fair Access Policy
Schedule 1
Harris CapRock Standard Energy Service

Each level of this Service is designated by a maximum data rate and includes specific fair access terms with regard to the amount of upstream (from the Customer remote site to the Harris CapRock network) throughput and the amount of downstream (from the Harris CapRock network to the Customer remote site) throughput. The chart below identifies the maximum monthly throughput ("Throughput Limits") allowed under this Policy for each service level in either throughput direction.

Each level of this Service is designated by a maximum data rate and includes specific fair access terms with regard to the amount of upstream (from the Customer remote site to the Harris CapRock network) throughput and the amount of downstream (from the Harris CapRock network to the Customer remote site) throughput. The chart below identifies the maximum monthly throughput ("Throughput Limits") allowed under this Policy for each service level in either throughput direction.
